Java | Spring Boot | React | JavaScript | MySQL | REST APIs | Data Structures | Git/GitHub | Problem Solving

### PROFESSIONAL SUMMARY

Detail-oriented and motivated aspiring Full Stack Java Developer with a solid foundation in Java, Spring Boot, SQL, and modern frontend technologies (React, JavaScript, HTML5, CSS3). Adept at building scalable, user-friendly web applications, writing clean and maintainable code, and applying data structures and problem-solving skills to real-world development. Quick learner with strong analytical thinking, eager to contribute to a collaborative engineering team and grow as a full stack professional.

### TECHNICAL SKILLS

- **Programming Languages:** Java (OOP, Collections, Exception Handling) | Data Structures & Algorithms (Arrays, Linked Lists, Stacks, Queues, Sorting & Searching)
- **Backend Development:** Spring Boot (REST APIs, CRUD Applications, MVC Architecture, Dependency Injection)
- **Frontend Development:** React (Hooks, Component-Based UI), JavaScript (ES6, DOM), HTML5, CSS3 (Flexbox, Grid, Responsive Design)
- **Database Management:** MySQL (Database Design, Queries, Joins, Relationships, Normalization)
- **Tools & Concepts:** Git & GitHub, VS Code, Postman, RESTful API Design, Agile Basics, SDLC
- **Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Teamwork, Adaptability

### PROJECTS

#### Acoustic and Vibration-Based Railway Track Health Monitoring System

*Sensors | Acoustic Emission | Vibration Analysis | Signal Processing | Anomaly Detection*

- Worked on a low-cost railway track monitoring concept using acoustic and vibration signals to identify potential track anomalies.
- Focused on collecting and analyzing track-related acoustic/vibration patterns for early detection of abnormal conditions.
- Designed the solution with practical deployment, low-cost sensing, and automated anomaly detection as key objectives.

#### Personal Portfolio Website

*HTML5, CSS3, JavaScript*

- Designed and built a modern, responsive portfolio website to showcase projects, technical skills, certifications, and contact information.
- Live demo: karishmamukilan20.github.io/my-portfolio | Source: github.com/karishmamukilan20

#### Student Management System

*Java, Spring Boot, MySQL, REST API*

- Built a CRUD-based full stack application enabling users to add, update, delete, and search student records efficiently.
- Implemented REST APIs with Spring Boot and integrated MySQL for persistent data storage.
- Source: github.com/karishmamukilan20

### EXPERIENCE

#### Aspiring Full Stack Java Developer

- Currently focused on developing real-world applications using Java, Spring Boot, React, and MySQL.
- Continuously improving development skills by building responsive websites, REST APIs, and CRUD applications while preparing for internship and placement opportunities.

### EDUCATION

#### B.E. Electrical & Electronics Engineering

2024 - Present

*Coimbatore Institute of Technology | CGPA: 7.83*

- Actively learning Full Stack Java Development, Data Structures, and Problem Solving alongside core academics.

#### Higher Secondary Education

2022 - 2024

*CBSE Board*

- Completed Higher Secondary education with a strong interest in Mathematics and Computer Science.

### CERTIFICATIONS

- Java Programming - OOP, Collections, Exception Handling, and JDBC
- Full Stack Web Development - HTML, CSS, JavaScript, React, Spring Boot, and MySQL
- SQL for Data Management - Relational database design, normalization, and query optimization
- Git & GitHub Essentials - Version control, branching strategies, and collaborative development

### ACHIEVEMENTS

- Developed multiple responsive web applications using modern frontend technologies.
- Regularly practice coding problems on LeetCode and HackerRank to strengthen analytical and problem-solving skills.
